LANCOM OAP-5G

Outdoor SD-WAN gateway with 5G for harsh environments

In outdoor areas with intensive weather conditions, such as large construction sites and event locations without a wired Internet connection, a reliable and powerful cellular connectivity is essential. Specially developed for these requirements, the outdoor SD-WAN gateway LANCOM OAP-5G offers flexible and future-proof 5G connectivity with maximum weather resistance. The robust IP67-rated housing is dust- and water-resistant. The VPN functionality via IPSec and WireGuard and an integrated 5G modem with four external antennas enable securely encrypted site networking via a cellular data connection with fast data transfer and optimum signal quality. With network management via the LANCOM Management Cloud (LMC), you not only automate and accelerate your workflows, but also save resource-intensive work in difficult-to-access or remote outdoor areas.

→ Secure SD-WAN – centralized cloud management with secure network separation, automated provisioning, and intelligent path control
→ Integrated 5G modem for low latency and high bandwidth for real-time applications
→ Robust IP67 protective housing – reliably protected against dust and water even at extreme temperatures (-20°C to +70°C)
→ Mounting kit for wall and pole mounting, cable and adapter included
→ Secure site connectivity with 5 simultaneous VPN connections (25 channels optional)
→ Integrated 5G modem, usable with 1x eSIM and 1x physical SIM card, for maximum network availability and low latencies in primary 4G/5G operation or in parallel with other access types
→ Flexible power supply via Power over Ethernet (PoE) according to IEEE 802.3at
→ Integrated stateful-inspection firewall with intrusion detection and Denial-of-Service protection

LANCOM OAP-5G

Fully future-proof with 5G

With the integrated SIM card slot and eSIM support of the LANCOM OAP-5G, you benefit from all the advantages of 5G technology. Low latency and high-performance use of real-time applications such as telephony, video chat, video streaming in 4K or 8K or augmented reality, even with a high user density, are possible.

Robust housing for maximum reliability in all weather conditions

The robust housing with IP67 protection class allows this cellular router to guarantee excellent Internet connections even in harsh outdoor environments and is completely dustproof and resistant to water jets. The LANCOM OAP-5G is thus optimally protected against external influences and is ideal for outdoor installation even at remote locations and construction sites. Thanks to an extended temperature range of -20°C to +70°C, the device provides reliable wireless connections under the most demanding conditions.

LANCOM SD-WAN – Next-level networking

With LANCOM SD-WAN you can manage and monitor your entire corporate network centrally, cost-effectively, quickly, and stress-free! In combination with the LANCOM Management Cloud, the SD-WAN gateway gives you all the options for an automated setup of secure VPN connections (Auto-VPN) between sites, including network virtualization. Highlight features such as High Scalability VPN (HSVPN) and Advanced Mesh VPN offer you a significant plus in scalability and efficiency for a large number of branches and applications. Furthermore, if multiple WAN connections are defined, they are automatically operated in active/active mode (load balancing), thereby increasing the available total bandwidth. With Dynamic Path Selection and Dynamic Traffic Steering, applications are also dynamically routed via the best connection at any given time.

Secure site connectivity via VPN

With virtual private networks (VPN), you use the public medium of the Internet as a communication path and secure the connection in such a way that the communication still remains completely inaccessible to external parties. This SD-WAN gateway offers you five integrated IPSec VPN channels for secure encryption, so that the protection of internal company data is always guaranteed when connecting mobile employees, home offices, or branch offices. With the LANCOM VPN Option, you can also upgrade the device to up to 25 VPN channels, so that the infrastructure can easily grow with your needs without additional hardware.

Stateful Inspection Firewall

Equipped with a stateful inspection firewall, the LANCOM OAP-5G protects the entire network. With functions such as intrusion prevention and denial of service protection, this device ensures optimum protection so that all data in the network is safe.
