## 10.92

### An update for enhanced network security

LCOS 10.92 enhances the security of your IT infrastructure. The new LANCOM Security Essentials Option – combining the Content Filter and BPjM module – enables you to reliably protect your networks against threats such as ransomware, phishing, malware, and credential theft, while also shielding underage users from inappropriate content.

## LCOS 10.92 Highlights

### Cloud-based network security with the LANCOM Security Essentials Option

With LCOS 10.92, you fulfill all the requirements to upgrade your devices with the [LANCOM Security Essentials Option](#). The LANCOM Security Essentials Option provides an efficient and reliable solution to protect networks against threats such as ransomware, phishing, malware, and credential theft. The integrated Content Filter effectively blocks unwanted and illegal internet content – preserving corporate integrity and significantly reducing liability risks. At the same time, the BPjM module of the German Federal Review Board for Media Harmful to Minors (BzKJ) reliably shields minors from harmful content. The underlying database used to verify website content is hosted in a GDPR-compliant cloud provided by European security specialist Bitdefender. For maximum scalability, use of the option is not limited to a specific number of users – making it ideal for growing networks.

Note: The LANCOM Security Essentials Option is available as an upgrade for LANCOM SD-WAN gateways, SD-WAN central site gateways, and WLAN controllers as the successor product to the LANCOM Content Filter.
