# LCOS 10.80
Feature Notes

LCOS Operating system

LCOS 10.80

More security for your SD-WAN gateways

In addition to many new functions, LCOS 10.80 now also provides even more security with top usability: Thanks to certificate creation via the free certification authority Let's Encrypt, encrypted HTTPS connections for WEBconfig and the LANCOM Public Spot can now be set up in no time at all.

Highlight

Let's Encrypt for WEBconfig and the LANCOM Public Spot
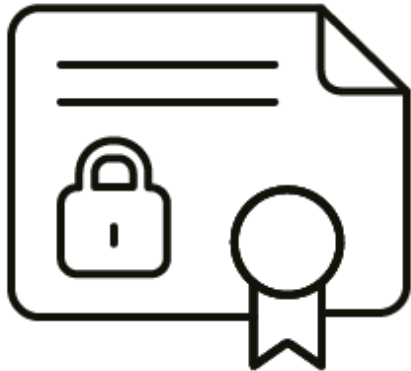

Free and trusted certificates

→ Certification authority for free HTTPS certificates

→ Encrypts your connections in a standardized way

→ Create, include and renew certificates free of charge and easily

Zero-touch rollout for mobile routers

Zero-touch support

→ Simple and secure setup of LANCOM cellular routers

→ Insertion of a PIN-free SIM card into the device is sufficient

→ Enables automatic connection to the Internet and the LANCOM Management Cloud to retrieve appropriate configuration of the gateway

LANCOM SYSTEMS

LANCOM vRouter available via Google Cloud

Use of Google Cloud possible

→ In addition to Microsoft Azure, VMware ESXi, Hyper-V and AWS, the Google Cloud is now also available

→ Use Cases:

- Secure connectivity and encrypted communication between customer site and virtualized infrastructure in Google Cloud

- Virtualization of central offices by replacing the use of a central gateway in hardware with the vRouter in Google Cloud

LANCOM
SYSTEMS

WEBconfig in new corporate design
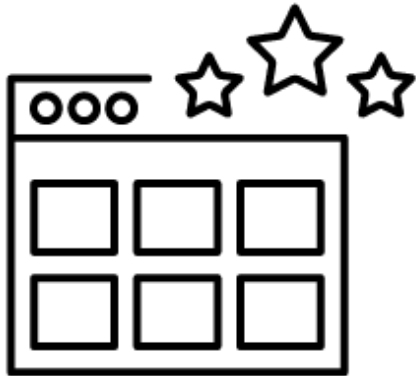

Maximum clarity in the new design

→   Now in new design

→   Clearer

→   More intuitive

→   Modern

→   More efficient
