# Feature Notes

LCOS 10.92

# LCOS 10.92
## An update for enhanced network security

LCOS 10.92 enhances the security of your IT infrastructure. The new LANCOM Security Essentials Option – combining the Content Filter and BPjM module – enables you to reliably protect your networks against threats such as ransomware, phishing, malware, and credential theft, while also shielding underage users from inappropriate content.

LANCOM
SYSTEMS

Highlight

# Cloud-based network security

## Support of the LANCOM Security Essentials Option

→   Software upgrade for LANCOM SD-WAN Gateways, SD-WAN Central Site Gateways, and WLAN controllers

→   Protect networks against threats such as ransomware, phishing, malware, and credential theft

→   Includes:

- Category-based filtering rules for web content
- Time- and profile-based configuration
- Comprehensive usage statistics
- Configurable category-based website overrides
- Unlimited number of users
- Blocking of harmful content for minors using the website list provided by the German Federal Review Board for Media Harmful to Minors (BzKJ)

# Further improvements

→    **Many other improvements** for the administration and operation of modern networks

Thank you!
